STATIC AND MOBILE MEASUREMENTS**

**17-20 September 2013
Saint Petersburg, Russia**

Co-sponsored by:

- RUSSIAN FOUNDATION FOR BASIC RESEARCH
- COMMITTEE FOR SCIENCE AND HIGHER EDUCATION OF SAINT PETERSBURG GOVERNMENT

You are invited you to take part in the **IAG Symposium on Terrestrial Gravimetry: Static and Mobile Measurements (TG-SMM2013)**. The Symposium will be held on September 17-20, 2013 at the State Research Center of the Russian Federation – Concern CSRI Elektropribor, JSC.

TOPICS

The Symposium topics include:

- instrumentation and methods for absolute and relative measurement of gravity fields, static and mobile measurements and their application to shipborne, airborne platforms (planes, helicopters, airships) and other mobile platforms;
- absolute ballistic gravimeters (including those based on the use of cold atoms), relative gravimeters of all types including superconducting gravimeters;
- gravity gradiometers;
- new results of measurement of gravity networks and the coverage of new regions;
- metrology issues in gravimetry, the results of the comparisons of absolute gravimeters, application of gravity measurements in metrology;
- standardization and databases of absolute measurements of the gravity field;
- gravitational experiments.

The following topics are especially welcome for presentation at the Symposium:

- new technologies and applications of gravity measurements such as planetary absolute and relative gravimetry;
- links between satellite and terrestrial or planetary gravity measurements;
- possible applications of terrestrial gravimetry in combination with GPS/GLONASS technologies;
- gravimetry applications in navigation.

The Symposium languages are English and Russian. Simultaneous translation from Russian into English and from English into Russian is provided.

The Symposium program includes plenary and poster papers. Presentation of plenary papers (including discussion) should be no longer than 20 min. The authors of poster papers at the plenary session are given 3 min to present the main idea of the paper with 1-2 slides, if any; further discussion will continue at the posters.
